Subject: Re: Final Water Quality Monitoring Data from Dredging
RM109 Dredge Monitoring SW Data.xlsx

The attached spreadsheet provides more clarity on sample description than the version sent earlier today. This one clearly shows whether samples were collected at Low Slack Tide (L designation), High Slack Tide (H designation), or were composited during multiple tide cycles in the day (C designation).

Attached is a spreadsheet containing all water quality analytical data from transect sampling during the period of dredging. This table differs from the prior submittal in that the (final) October 1 sampling event has been added.

Please call me if you have any questions.

Stan
